

Tempra AS has new owners!

An era is over and a new and exciting time begins.

Nordic Climate Group AB has acquired Tempra AS and we look forward to the journey ahead, together with them. Nordic Climate Group AB currently consists of 34 refrigeration contractors. Tempra is the second refrigeration contractor in Norway to join the group.

Nordic Climate Group was established in the spring of 2021 and consists of a nationwide network of local refrigeration companies. In total, the group has a turnover of about SEK 1.5 billion and around 600 employees in Sweden and Norway.

All companies work with installations and service in the refrigeration and heating industry with a focus on sustainability and energy efficiency. The companies take full functional responsibility for all installations, including machines and maintenance services.

By joining forces with Tempra, we get synergy effects both in terms of technical solutions and deliveries, says Mats Åstrøm, CEO of Nordic Climate Group. Tempra has significant professional knowledge and competent employees who currently operate in the areas where the Nordic Climate Group is active. This strengthens our opportunities to help our customers with good, energy-efficient, and environmentally friendly solutions in the Nordic region.

We look forward to being part of a much larger environment, both technically and marketwise, says Øyvind Skulstad, General Manager of Tempra. This will give us greater opportunities for large national customers that we previously could not satisfy with the service apparatus we had. At the same time, both me and the employees look forward to exchanging expertise with the others in the group.

The Norwegian fish export is increasing every year and so does the need for competent people to serve our container customers. With Nordic Climate Group we become more capable, not only in Aalesund, but all along the Norwegian coastline, says Harald Skulstad, now head of the Container Department

Father and son, Harald and Øyvind Skulstad

We continue operations as before, with the same good employees. We will continue our work to deliver cooling and heat-pump technology to our customers, with associated services. The advantage now is that we become part of the Nordic region's most powerful group in this area of expertise. Our address, contact information and VAT-number remains unchanged.
